

Erratum: Using the Mixed-Meta Method to Assess Portfolios in Science Teaching

Mehmet Diyaddin Yaşar,¹ Veli Batdı,² Büşra Kiliç,¹ Ayşe Nur Kiliç¹

1. Harran University, Şanlıurfa, Turkey
2. Gazianep University, Gaziantep, Turkey

The corrections should be made as below,

- The (Alkan et al., 2019) used in the Methods section needs to be deleted. The Alkan et al. study is a mixed method [(Mixed methods design: a narrative literature review. Journal of Qualitative Research in Education, 7(2):559-582)]. However, the term used in our study is mixed-meta method. In addition, the term belongs to a different author and it has a completely different definition. (On the pages 3900 and 3914).
- Instead of “(B üy ük özt ürk et al., 2018 p.259-260)” (Batdı, 2020, p.3) should be added under the title “Meta-analysis procedure”. (On the page 3903).
